

Landfall Tuff

Discover more about Landfall Tuff.

Hard-wearing, self-repairing and built to last

Landfall Tuff is a robust tall fescue-based blend engineered for strength, durability and low maintenance. With a deep root system and natural drought resistance, it retains colour and performance with less water, making it an ideal long-term solution.

Designed to handle heavy wear, Landfall Tuff offers excellent recovery and self-repairing qualities, reducing the need for ongoing intervention. It delivers a dense, hard-wearing surface that stands up to both everyday use and demanding commercial applications.
